

# TRUSS

Make your connections easier, faster and BETTER with CAMO® Truss Screws. Code-compliant and exterior-coated, for both indoor and outdoor use, our truss screws are the ideal replacement for hurricane ties in general construction and decking applications.

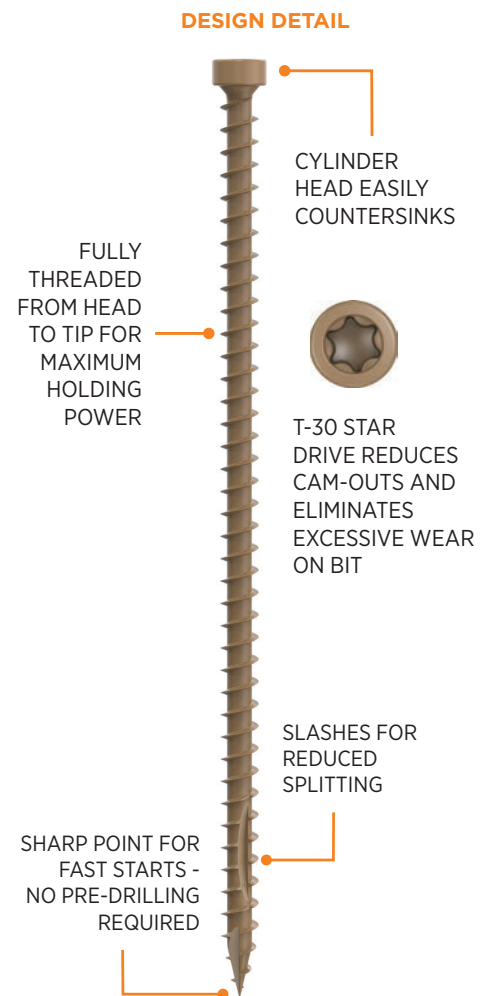

## PROTECH® **ULTRA 4** COATING INDUSTRY LEADING COATING SYSTEM

Our proprietary PROTECH Ultra 4 four-layer coating system protects your connections against the harshest environmental elements. Each layer works together to provide optimum corrosion resistance, UV and environmental protection, and torque reduction for a high-performing, long-lasting screw. Tested in accordance with ASTM G198, the coating meets or exceeds the protection of code-approved hot-dip galvanized (ASTM A153, Class D) in ground contact general use pressure treated lumber (AWPA UC1-UC4A).

**LAB TESTED  
HIGHEST  
RATED COATING**

Our coating is tested 2X longer than industry standard - so you can be confident your connections will last.

## COLOR AND COATING

### PROTECH® **ULTRA 4** COATING

**TAN**  
LENGTH
